

Dust control. The difference is black and white.

You hate sanding joint compound. Your installers hate it. Your customers hate it. All because of the dust. The cloud of dust that clogs dust masks, blinds goggles, invades ventilation systems and slowly settles on every square inch of every surface, a mess that takes hours, even days, to clean up.

Down with dust.

USG SHEETROCK® brand lightweight all purpose joint compound with dust control is the first and only joint compound that dramatically reduces airborne dust. Its unique “heavy dust” particles bind together and drop straight to the ground, ready to vacuum up in no time at all.

See your way clear to a faster job.

With SHEETROCK brand lightweight all purpose joint compound with dust control, there’s no cloud of dust to settle on anything. So there’s no extensive prep. You save hours in cleanup time, for a faster job overall. Leaving behind a good, clean finish. A good, clean workspace. A happier client. And more money in your pocket.

When the dust goes down, the quality goes up.

SHEETROCK brand lightweight all purpose joint compound with dust control brings you the same great performance of the original — but with far less airborne dust. Offering the bond of a taping compound with the easy sanding of a topping compound, SHEETROCK dust control joint compound minimizes shrinkage, weighs 35% less than ordinary joint compounds, and usually requires just two coats over metal — for even more time and money savings.

Try SHEETROCK brand lightweight all purpose joint compound with dust control on the job today. Because when you say, “down with dust,” you’ll see your way clear to a faster, cleaner job.
